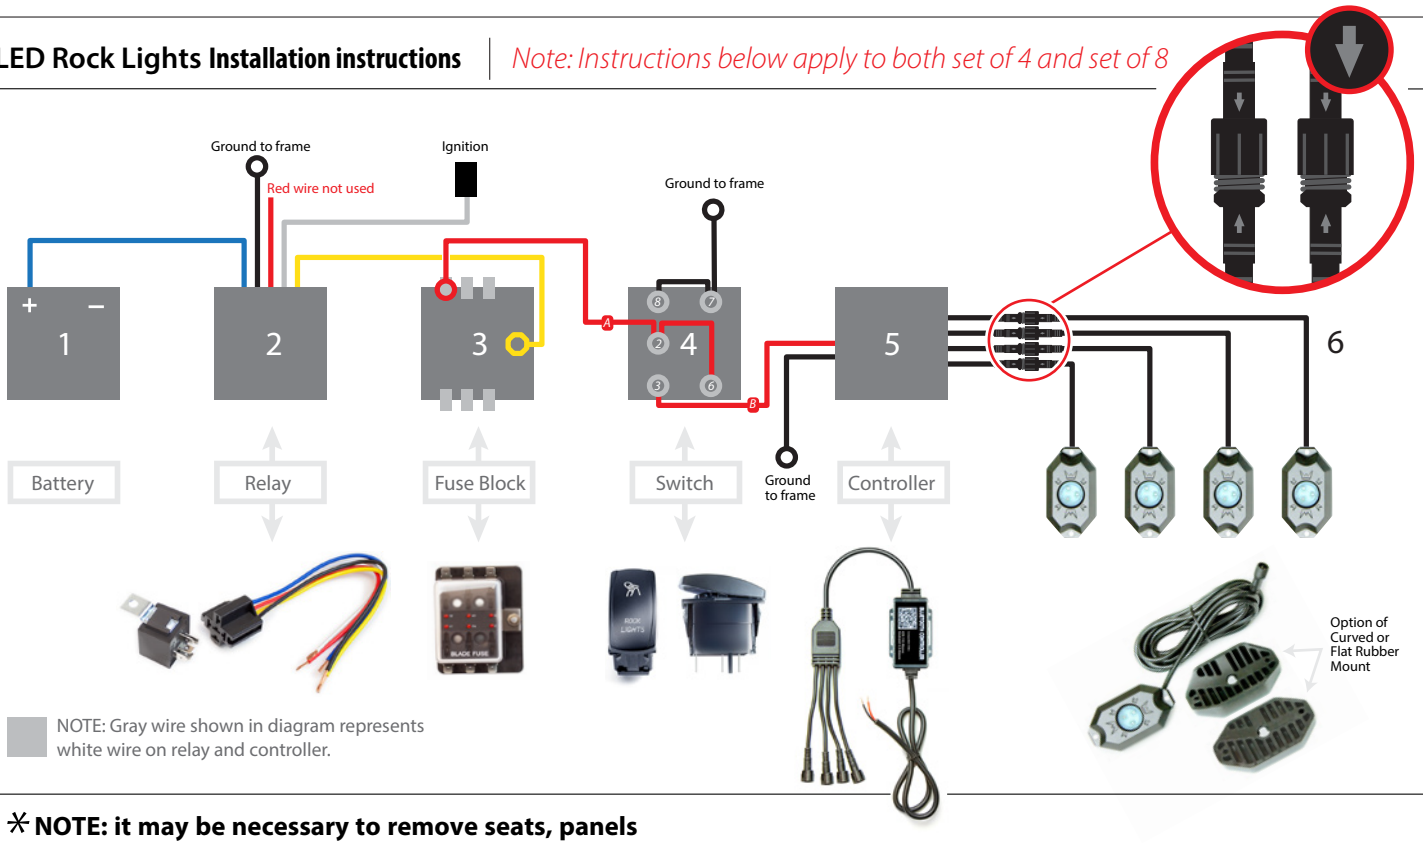
CAUTION:

To prevent damage from occurring, please read instructions carefully and completely before proceeding with Installation.

Not following instructions as indicated may void your warranty.

NGL LED Rock Lights Installation instructions

Note: Instructions below apply to both set of 4 and set of 8



NOTE: it may be necessary to remove seats, panels and trim for easy access to run wires and cables.

1. Find a suitable location where the **Controller**(**5**) can be safely mounted while being protected from damage (preferably under the dash with easy access to the wires) and allowing for enough cable to reach the **Rock Light**(**6**) cable.
- *Action:* Mount withss 2 screws or bolts.

2. Find a location under the dash to mount the fuse **Relay**(**2**) and the **Fuse Block**(**3**).

3. Choose a location for the **Switch**(**4**).
- *Action:* If available remove the blank in the dash board and mount **Switch**(**4**).

4. Choose a location to mount your **Rock Lights**(**6**).
- *Action:* Mount lights and rubber base (flat or curved) under fenders.

5. Run **Rock Light**(**6**) cables towards the **Controller**(**5**) keeping the cable protected from posible damage.
- *Action:* Connect **Controller**(**5**) cables to the **Rock Lights**(**6**). **Make sure the black arrows are aligned (see 6). Protect the connections from damage.**

Wiring the Controller(5):
- **Red** wire goes to the **Red B** wire on **Switch**(**4**)
- **Black** wire to ground

Wiring the Relay(2):
- **Black** wire to ground
- **Blue** wire to battery positive
- **White** wire to a powered signal from a key on position
- **Yellow** wire to the stud on the **Fuse Block**(**3**)
- **Red** wire not used

Wiring the Switch(4):
- **Red A** Wire to **Fuse Block**(**3**)
- **Red B** wire to **Controller**(**5**)
- **Black** wire to ground
